**Course Title:** Methods of Calculus

**Course Number and Section:** MATH 1225B 553

**Instructor Name(s):** Marina Palaisti

**Instructor Email(s):** mpalaist@uwo.ca

Disclaimer: Information in the brief course outline is subject to change. The syllabus posted on OWL is the official and authoritative source of information for the course.

**Course Description:**
Logarithmic, exponential and trigonometric functions; integration, area; techniques of integration, improper integrals; functions of several variables, Second Partial Test, Lagrange Multipliers; differential equations, applications of differential equations.

**Learning Outcomes:**
- Study the derivatives and integrals of functions of one variable
- Study the derivatives of functions of multiple variables
- Optimization for functions of multiple variables
- Solve basic differential equations

**Textbooks and Course Materials:**
Custom Text for Maths 0110A/B, 1225A/B, 1230 A/B, 1st edition

**Methods Of Evaluation:**

<table>
<thead>
<tr>
<th>Assignment</th>
