Course Description:
A multi-disciplinary overview of Japan, including territory, people, language, religion, economy, popular culture, science and technology, among others

Course Objectives:
After successful completion of this course, students will be able to demonstrate
- knowledge and understanding of the main parameters of Japan Studies and East Asian Studies;
- their ability and skills in discussing and analyzing topics related to Japan;
- critical reading and thinking skills on the subject matter;
- their ability to use modern research methods;
- their ability to evaluate the relevance and importance of different ideas.

Class Methods:
The course presupposes no knowledge of Japanese civilization. Students investigate – and formulate questions – on Japan and East Asia within today’s globalized world, identify their own cultural bias toward less familiar subjects, and critically evaluate diverse perspectives. Students are expected to prepare for each class by doing short (preliminary) research.

Course Readings: Required readings are available on OWL and will be posted each week.

Evaluation:
There are 3 short papers (1-2 pages each) (10x3=30) and two short essay proposals (10), the final paper (40=40), and class performance (20%).

Short Papers:
The due dates are absolute unless an extension is granted. The short papers are generally revised and resubmitted.

The Appendix to Course Outlines is posted on the OWL course site.
